

Digital solution to FREE MEALS for smaller EVENT WORKFORCES

- Enables smaller event operators to utilise digital e-voucherz
- No need to design, print and distribute paper meal vouchers
- Reduces fraudulent use
- Live data on e-voucherz issued and redeemed
- Instant unbiased approval at meal delivery point
- Speedy approval process
- No more storing, counting and reconciling redeemed paper vouchers
- No requirement for workforce management system - details of users on site each day are loaded by simple spreadsheet
- Full implementation support by experienced team

e-voucherz technology was used successfully at the 2022 Qatar World Cup

Organiser provides
Venue, Meal occasions,
User types, Shift
structure, Meal
entitlements prior
to the event

Each day organiser loads a spreadsheet
providing details of everyone working
that day. Name, Username, Email address,
User type, Shift (if required)

Organiser inputs number of
planned meals. (optional)

System calculates each user's
meal entitlement for that day

e-voucherz generated.
Email with e-voucherz
sent to each user

User presents e-voucherz
on their phone at agreed
catering location

Immediate Green/Red
(Yes/No) display

Caterer scans e-voucherz
QR code with gun scanner

Green caterer provides meal.
Red reasons for rejection
provided

Live reporting - updated

For green, provision of meal
confirmed in system, red
rejection recorded in system

Administrators can monitor live number
of e-voucherz redeemed v number issued
v number of meals planned, by venue, by
meal occasion by user type
